

Design Loop - Closed iterative demonstration

DKL($\tilde{p}_{\text{user}} \parallel p_{\text{cup}}$) decreases as the designer's model is updated

A | Gap convergence
(forward loop $\rightarrow$ inverse loop)

B | Gap matrix (iteration 0)
DKL($\tilde{p}_{\text{user}} \parallel p_{\text{cup}}$)

C | Gap matrix (iteration 2)
Gap reduced - designer's model converged
